

OLAFUR ELIASSON'S STARBRICK

PRESENTED IN A SPECIAL INSTALLATION IN VENICE

August 26 to September 12, 2010

Ludoteca, Sestiere Castello 450, Venezia

Zumtobel is proud to present Olafur Eliasson's versatile light module Starbrick in an exhibition parallel to the 12th International Architecture Exhibition of La Biennale di Venezia.

Based on a stackable principle, Starbrick is a star-shaped lamp that can be assembled to structures of almost any size and combination, whether freestanding, hanging or integrated into walls and ceilings. The modular system therefore allows to purchase a lighting device which is adaptable to a wide range of requirements, both within private contexts and as a stunning lighting solution tailored for fulfilling the specific needs of a public building.

An experiment with light modulation and space, Starbrick is a result of the ongoing research into the relations between space and geometry at Studio Olafur Eliasson as well as the continuous technical exploration of different qualities and hues of LED light undertaken by Zumtobel.

Starbrick is part of Zumtobel's lighting series *Masterpieces*, for which the firm invites leading architects, designers and artists to jointly develop lighting ideas of unique beauty and quality. Reflecting the wish of the artist, the Starbrick edition is unlimited. The light module is presently exclusively sold via the website www.starbrick.info.

The single Starbrick can be used as a pendent, floor and/or table luminaire.

Size: 550 × 560 × 460 mm / Ø 580 mm

Weight: Light module: 7 kg (15.4 lbm) / Ballast: 2.5 kg (5.5 lbm)

LEDs: Operating voltage: 90 – 260 V / Connected load: max. 100 W

Certification mark: CE conformity

Olafur Eliasson: Starbrick

Exhibition dates: August 26 to September 12, 2010

Opening hours: daily 10am – 6pm

Admission free

Ludoteca

Santa Maria Ausiliatrice

Sestiere Castello 450

30122 Venice

(The Ludoteca is situated midway between the Giardini and the Arsenale venues of the Biennale)
